c. What changes you made in what files

1. In Model package, created a separate OptionSet class.
2. Added methods to update and delete by index and name in automobile and OptionSet class.
3. The read me is updated with design details for parsing the file. I have added comments wherever possible.

d. Show test cases for changes made (if applicable)

2. Added relevant test cases. The output file is updated.

e. How many points should be added back in your opinion.

I think I have done my best to fix the issues. I have added more functionality to update or delete the options. I have included methods for basePrice as well.
